

ET'S H₂S & ODOR ELIMINATOR

Description

ET's H₂S & Odor Eliminator is a biological product specifically formulated to save operator time and expense in lift stations or biological wastewater treatment plants. ET's H₂S & Odor Eliminator contains bacteria selected for their performance under both aerobic and anaerobic conditions.

To assure optimal performance of these organisms, under the toughest conditions, they are produced and blended together with "high potency" nutrients and stimulants. Along with specific surfactants to aid in cutting through grease.

ET's H₂S & Odor Eliminator contains a specific nutrient blend to work synergistically with the added and naturally occurring bacteria, to prevent the formation of hydrogen sulfide gas by sulfate reducing bacteria typically found in sewer lines. This saves in customer complaints and in corrosion damage.

ET's H₂S & Odor Eliminator is non-toxic, biodegradable, non-corrosive, non-volatile, and non-flammable.

Packaging

4, 8 & 16 oz. water soluble packages protected by a resealable overwrap. 25 lbs. per plastic pail • Bulk 25 lbs., 50 lbs. and 100 lbs.

Benefits of ET's H₂S & Odor Eliminator:

- Controls hydrogen sulfide odors.
- Enhances BOD and COD removal while improving sludge settlement.
- Reduces hydrogen sulfide related to corrosion of the sewer lines.
- Reduces the accumulation of unsightly Deposits of fats, oils and greases.
- B220S works in the lift station, force main, and gravity main through to the treatment plant or Lagoon.
